

Aim:

write a program on dynamic binding

Source Code:**Demo.java**

```
class Human{
    public void display(){
        System.out.println("Human walks");
    }
}
class Boy extends Human{
    public void display(){
        System.out.println("Boy walks");
    }
}
class Demo{
    public static void main(String args[]){
        Boy b=new Boy();
        b.display();
        Human h = new Human();
        h.display();
    }
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Boy walks
Human walks
